

39 Years in Aviation, Part Two: 'The Killing Zone'

Richard Wing flew for Northwest Airlines for thirty-nine years, retiring as a 747 captain. In his first seminar, he reflected on a long career in aviation and the lessons he learned along the way. In this second installment, Captain Wing will apply those lessons to "the killing zone," the early hours of a pilot's career where a safety focus is paramount. War stories will, of course, be told. Please note: Facility size limits attendance to those who register for the event on www.faasafety.gov. If interest is high, we will attempt to schedule additional dates.

Directions: The meeting will be held at the Sim Flite Minnesota facility adjacent to and just west of R.C. Avionics.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
